IRIT - Toulouse III - France

1

## Cooperative Agent

- Ignores the global function
- Local goal
- Cooperative relations with others

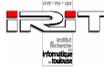

Cooperative Agent

TFG AOSE, July 2004

4

## What is ADELFE?

- Agent-oriented methodology
- To build Adaptive Multi-Agent Systems
- Agents having a cooperation-driven social attitude
- <http://www.irit.fr/ADELFE>

TFG AOSE, July 2004

2

## The Environment

```

classDiagram
    Classifier <|-- Environment
    Classifier <|-- Element
    Environment "1" -- "1..*" Element
    Element "1..*" -- "1..*" CooperativeAgent
    CooperativeAgent "1" -- "1" Element : perceives
    CooperativeAgent "1" -- "1" Element : acts on
    
```

- Important notion
  - ✓ Perceived by an agent
  - ✓ Modified by an agent
- Two levels
  - ✓ System level
  - ✓ Agent level

TFG AOSE, July 2004

5

## Why Meta-Modeling?

- Meta-model
  - ✓ Modelisation
  - ✓ Concepts definition
- Advantages
  - ✓ Unification eases model transformation
  - ✓ Design a system  $\cong$  instantiate a meta-model

TFG AOSE, July 2004

## Features of an Agent

- An agent:
  - ✓ Possesses knowledge about others, its environment, itself
  - ✓ Reasons about its knowledge and beliefs
  - ✓ Realises its partial function
  - ✓ Has intrinsic or physical properties
  - ✓ Communicates with other or its environment

```

classDiagram
    Environment "1" -- "1..*" Element
    Element "1..*" -- "1..*" CooperativeAgent
    CooperativeAgent "1" -- "1" Element : perceives
    CooperativeAgent "1" -- "1" Element : acts on
    Skill "1" -- "1" CooperativeAgent
    Aptitude "1" -- "1" CooperativeAgent
    Characteristic "1" -- "1" CooperativeAgent
    Communication "1" -- "1" CooperativeAgent
    AIP "1" -- "1" CooperativeAgent
    
```
